

RE: HR 4026 Since I pay for my satellite radio service (and it isn't cheap), I demand to have any broadcast, anytime, anywhere without interference from NAB or any other government meddler. If subscribers want Howard Stern or Traffic updates or weather reports, there is no reason why satellite shouldn't provide it - IT IS A PRIVATE, CLOSED MARKET - KEEP OUT! There is absolutely nothing else available like satellite radio and I strongly object to the NAB (and "Chip" and "Gene") trying to "dumb-down" satellite to make it as bad as publicly available radio. Honestly, what sort of Nazi would support censorship of private radio????
